DETAILED ACTION

Election/Restrictions

Applicant's election of group I, species I in the reply filed on 04/26/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 9-23, 25-29, 31-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Sahota et al (US 5,370,608) and Fuller et al (US 6,139,57). Sahota et al (Figure 1) and Fuller et al (Figure 1) both disclose a device for localized contact of a fluid to a target site (Fuller et al, Column 3, Line 50 – Column 4, Line 42) comprising a fluid delivery element, a porous region, and an aspiration element (Sahota et al Column 1, Line 47 – Column 2, Line 38).

Claims 44-53 are rejected under 35 U.S.C. 102(b) as being anticipated by Constantz et al (6,488,671). Constantz et al teaches a system and a kit (Figures 1-4) for use in delivering a fluid to a target site (Column 2, Lines 8-22).

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 8, 21, 29, 30, 31, 33, and 34 are rejected under 35 U.S.C. 102(e) as being anticipated by Briskin (US 6,228,046). Briskin discloses a device (Figure 2A) comprising a fluid delivery element, a porous region, an aspiration element, and an external energy application element that is of sonic energy (Column 3, Line 15 – Column 5, Line 15).
